

# Price list

## Domestic transport

Valid from 1 October 2019

This is our basic price list.

### Getting oriented in the price list

This page contains prices for basic services divided into three categories: Classic (suitable for sending parcels between companies or their branches), Solutions (perfect services for e-shops) and Express (services ensuring fast and guaranteed delivery). On the following page, you will find prices for additional services.

### Calculating the price for transport

The price depends on the parcel weight and it does not include the toll fee and fuel surcharge (their current amounts are available at [www.dpd.cz](http://www.dpd.cz)).

### Important dimensions of the parcel

Weight (max. 20 kg for the Pickup service, max. 31.5 kg for the Express service, max. 50 kg for other services), Length of the longest side (max. 175 cm and max. 100 cm for the Pickup service) and Girth (max. 300 cm and max. 250 cm for Pickup ParcelShops). Girth is calculated according to the following formula:  $2 \times \text{width} + 2 \times \text{height} + 1 \times \text{length}$ .

Weight of the parcel up to (kg)	Classic Services	Solutions		Express Services		
	DPD CLASSIC	DPD Private	Pickup	DPD 10:00	DPD 12:00	DPD 18:00
